Carlos Manuel Vera Leon

Marketing Data Analyst | Python · Meta Ads API · Next.js · AI Automation

Cochabamba, Bolivia · +591 77442301 · veramanuelvlc@gmail.com linkedin.com/in/manuel-veraleon · github.com/veramanuelvlc-pixel · manuel-vera-portfolio.vercel.app

PROFESSIONAL SUMMARY

Marketing data analyst specialized in automated reporting, real-time dashboards, and AI integrations. I build systems connecting Meta Ads, Klaviyo, and Shopify with modern data stacks (Python, Next.js, Supabase), cutting manual reporting time by up to 80% for agencies and clients in fintech, legal, and e-commerce.

EXPERIENCE

Marketing Data Analyst — Engage Media Solutions *Nov 2024 – Present*

- Automated weekly Meta Ads reports with Python (ReportLab + pandas) for 8+ clients, cutting manual reporting time by 80%.
- Built Next.js dashboards integrating Meta Ads API, Klaviyo, and Shopify, with real-time visualizations for clients in legal, fintech, and e-commerce.
- Developed a lead classification and attribution system for The Founders Law, processing 1,000+ weekly contacts and cross-referencing Meta Ads data with CRM (GoHighLevel).
- Integrated the Claude API for automatic natural-language insight generation from campaign data.
- Designed attribution pipelines matching Meta leads (form, landing page, WhatsApp) against CRM and sales records, normalizing contact data for accurate matching.

Customer Success / Data Analyst — BAMC Incubator *Nov 2024 – Present*

- Built dashboards and automated reports to monitor KPIs and customer engagement.
- Supported sales and marketing teams with operational tasks, reporting, and follow-ups.

Customer Operations Analyst — Compañía Boliviana de Tickets y Controles S.R.L *Apr 2022 – Nov 2024*

- Analyzed sales and customer data for commercial and administrative teams.
- Built Power BI and Tableau reports to support decision-making.
- Contributed to customer retention initiatives through data analysis and process optimization.

FEATURED PROJECT

Technical portfolio with production dashboards — manuel-vera-portfolio.vercel.app

- 5 full-stack dashboards (Next.js 16, TypeScript, Recharts) built on Python-simulated datasets modeled on real business scenarios: Meta Ads, e-commerce, email marketing, real estate, and an AI report generator.
- AI Report Generator: a system that takes a campaign CSV and uses the Claude API to generate natural-language analysis and recommendations.
- Bilingual site (ES/EN) with light/dark mode, deployed on Vercel with CI/CD via GitHub.

TECHNICAL SKILLS

Marketing & Ads: Meta Ads API, Klaviyo API, Shopify API, Google Analytics, GoHighLevel

Data & Code: Python, pandas, SQL, Next.js, TypeScript, Supabase, React

AI & Automation: Claude API, ReportLab, OpenClaw, Make.com

Visualization: Power BI, Tableau, Looker Studio, Recharts, Excel (Advanced)

Infrastructure: Vercel, GitHub, Git, CI/CD

EDUCATION

Bachelor's Degree in Financial Engineering — Universidad Católica San Pablo (2016 – 2020)

LANGUAGES

Spanish: Native · English: Advanced (spoken and written)
